STREET OR TRACK?
WE CAN SUPPLY AND PERSONALISE
ALL THE PERFORMANCE PARTS
YOU WILL NEED

Ever since starting out in 1976, the focus for Öhlins Racing AB has been on becoming the obvious choice for those who want a shock absorber that goes beyond the run-of-the-mill shock absorbers, and that surpasses the highest of standards. Keeping these performance shocks in tip-top condition is the priority of HKL Racing.

Different shock absorbers are needed for motorcross and touring. Öhlins has developed specially designed shock absorbers for enduro, supermotard, dual sport, cruiser, sport, hypersport and racing as well. Every shock absorber is a technically advanced product with respect to performance, precision, quality, endurance, safety and reliability. Proper maintenance at HKL will ensure that your Öhlins shock absorbers are constantly achieving on the street or race tracks.

It is no coincidence that more and more "ordinary" motorcyclists – who think only the best is good enough – are discovering that Öhlins shock absorbers keep the same high standard for their motorcycles as they do for the world's elite.

Struggling with the set-up of your road bike? Call the professionals and receive the same technical back up enjoyed by HKL Racing Team

For sports racers, performance bikes are extreme machines that require extreme shock absorbers. These motorcycles are manufactured so that they can be ridden both in normal traffic and on the track. But it is track riding that sets the standard. Öhlins tests almost 100% of its shocks on the race track, and are also involved with leading racing teams where Öhlins technicians are faced with problems they have to solve under tough racing conditions.

Öhlins shocks for hypersport bikes are at an extremely high technological and functional level where at HKL Racing, your shocks can be setup or tuned to make you and your motorcycle a winner on the street or track.
